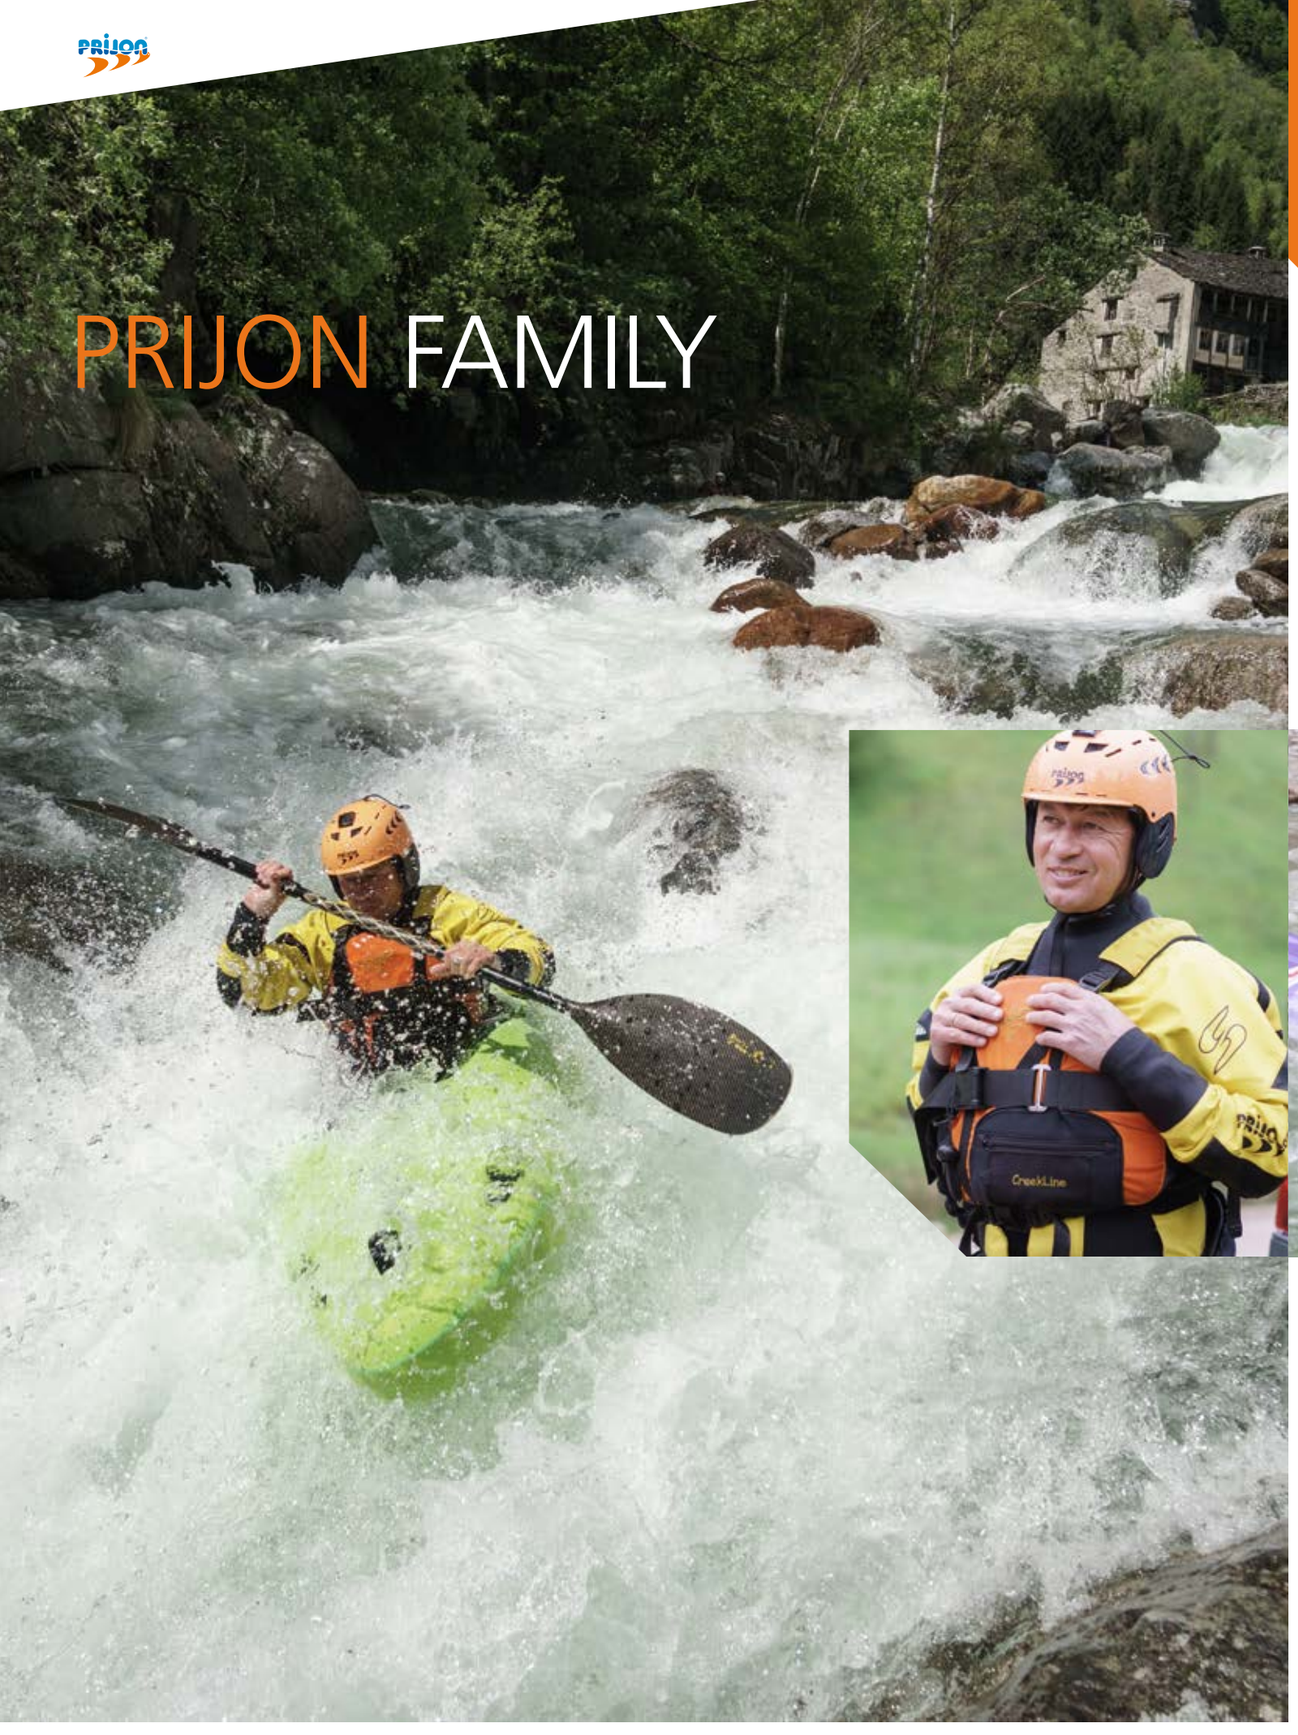
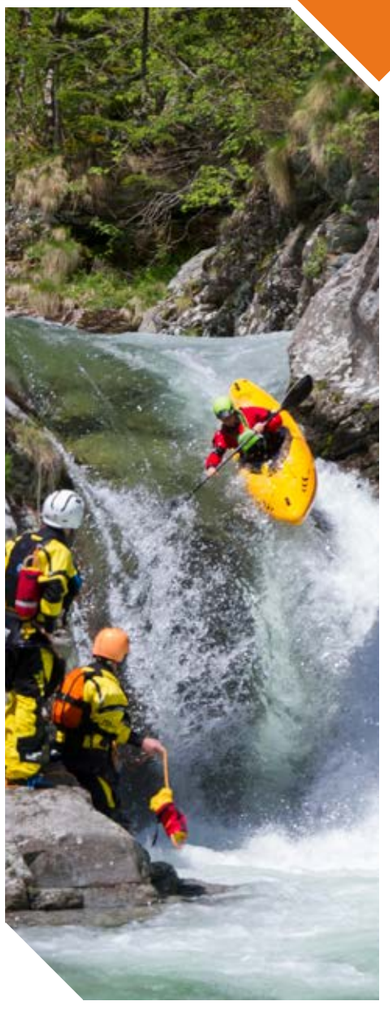
PRIJON FAMILY





KAYAKSPORT **IS OUR PASSION**

We're already infected with the kayak-virus in the fourth generation. In our kayak factory in Rosenheim we develop, assemble and test our kayaks.

Our passion for kayaking is expressed in our kayaks. We're proud of producing in our home Bavaria, being close to the majority of our customers and being able to safeguard jobs in the long term. We're also consequently trying to source our carefully selected parts locally to support domestic producers and to meet ecological requirements. Our HTP is recyclable, very durable and the used colors are free of heavy metals.

You'll feel our passion, when using our kayaks.

NEXT
GENERATION

Isabel Prijon, Born in 1997,
special discipline downriver racing.
Vice world champion in the 2015 team-races on the Nantahala River near Bryson City/USA.
Member of the DKV squad and sports personality of the year 2015 of the BKV.

Severin Prijon, Born in 2000,
special discipline canoe slalom.
Member of the BKV squad.
Enthusiastic whitewater paddler.

WHICH BOAT IS THE RIGHT ONE FOR ME?

We have divided our touring and seakayaks into 3 categories, in order to make the selection process easier.

1. Kayaks for beginners and occasional paddlers
2. All-round touring boats for rivers and lakes
3. Fast single kayaks for lakes, coast and the sea

The division is mainly made according to boat shape and purpose.

Regarding boat shape you can simplify:
long + slim = wobbly + fast
short + wide = stable + slow

Further distinctions can be made regarding the equipment of the kayak. If you are looking for a kayak for tours with luggage, then all-round touring boats or fast single kayaks are better suited, as they have certain standards of equipment, like water-tight storage and perfectly adjustable seating position.

But a basic rule is: Test first, then buy!

You will find a list of expos and testing events supported by us at **www.prijon.com.**

FAST SINGLE KAYAKS (1)

These boats are comparatively slim and long, which provides them with a high base speed and good tracking qualities. Ideal for sporty and ambitious paddlers and faster tours.

You find the fast single kayaks **from page 18 ...**

ALLROUNDERS (2)

This category is ideal for a vast range of terrains, from rivers to coastal waters in calm conditions. Here you will find well-tried allrounders for luggage tours, for example the Touryak, agile kayaks for fast-moving rivers, like the new ENDURO 450 and various two-seaters. These boats have been constructed a bit shorter and broader to provide a higher level of base stability.

You will find the allrounders **from page 10 ...**

BOATS FOR BEGINNERS (3)

These kayaks are very similar to the allrounders with regard to boat shape. They have good tracking and are good to maneuver. The essential difference is the technical equipment of the boats. There are fewer waterproof storages and the seating is also simpler. Therefore these boats are very well suited for short tours without a lot of luggage or for kayak rental.

You can find these kayaks **from page 25 ...**

EVERYTHING AT A GLANCE

You can leave our info centre folded out while browsing through our catalogue. This way you have all important information at a glance and can compare boats easily, as in addition to standard data like length or width of a kayak, you will find detailed information like the recommended total load, equipment characteristics and riding qualities.

This will help you select the right kayak for you.

SEA KAYAK TOURS

Our guided seakayak-tours are very popular among paddlers for years.
The Dalmatian coast is one of the most beautiful paddling territories in the world, thanks to its clear water and rocky coastline. Enjoy a memorable week of beautiful day tours with our experienced guide. Choose between our Croatian bases Prvič (near Šibenik) and Risanka on the main island of Kornati in Kornati National Park. For our base in Risanka we are additionally offering the tour starting from Sali on the island of Dugi Otok.

Prvič Island: The island of Prvič is located about 15 kilometres south of the Kornati archipelago and approximately 3 kilometres from the mainland. It is one of the islands of the Šibenik archipelago which are closest to the mainland.
Kornati Island: Our base is in Risanka, on Kornati main island, in the middle of the Kornati National Park.
From here we can easily start kayak tours and a holiday cottage is at our disposal in Šibnate bay.

For further information please go to our website www.prijon.com. If you have questions, feel free to contact us by phone at: +49 8031 / 3037-0 or by email at: seekajak@prijon.com.

You would just like to hire our equipment locally?
On PrvičIsland it is possible to rent our sea kayaks plus spray deck and paddle.
Please call us or make a reservation on our website.

THE EXPERT DEALER OUR PARTNER, YOUR ADVISOR!

You will get your kayak via a large network of dealers all over Germany. Our expert dealers have long-term experience and can advise you in a competent and purpose-oriented manner. The close proximity to production makes it easy to deal with special requests, if technically feasible. Our dealer will be happy to advise you.

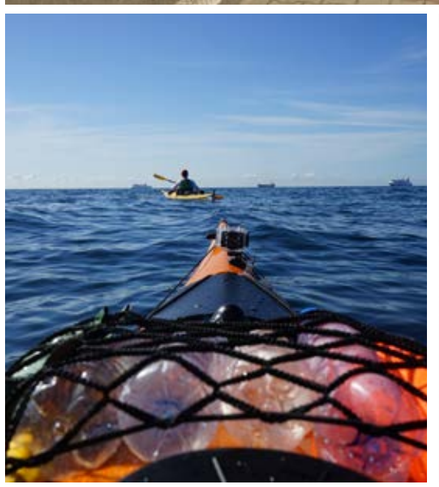
Here's where you will also have the opportunity to test your desired boat in advance, so that you can make the best choice. At many dealer events and expos we are present ourselves, together with our experts, in order to present our products to you. You can find currently updated info on our network of dealers as well as events on our website **www.prijon.com**

SERVICE

We are happy to fulfill special requests, if they are technically feasible, and will build your individual kayak for you. In the event of problems, we will try and find a fast solution together with your dealer. "We are within easy reach!" We can supply you with spare parts for many years.
Our warehouse is at your disposal.

EUROPE CROSSED

3.300K FROM SWEDEN TO THE BLACK SEA



From Sweden to the Black Sea
Jonathan Lundqvist & Marcus Aspsjö

To paddle from Sweden to the Black Sea is an ambitious scheme, and Jonathan Lungqvist & Marcus Aspsjö from Sweden made this journey as their first of a series of three adventures which they'll do over a year.

They choose Prijon Prilite Marlins as their kayaks, because this model has the reputation of being a sturdy, stable, durable and efficient expedition kayak. Offering a good cargo capacity with the performance to make their journey in their planned time frame. Their first leg of 500 km followed the Danish coast after crossing over from Helsingborg in Sweden, then down to the south east tip, where they did a seven hour open water crossing of the Baltic Sea to Germany, followed by a short paddle up the coast of Poland into the Odra river.
800 km later, after paddling upstream through Poland into Slovakia, they faced the next major obstacle, a 100 km walk dragging their kayaks over a mountain pass into the Vah river on the other side.

Now, as they paddled with the flow, they progressed much faster. Soon they were paddling past Budapest on the Donau, then into Serbia. They met colorful friendly locals along the riverbanks as they camped each night under the stars cooking on open fires. Following the border to Rumania and then into Bulgaria they eventually found themselves at the river mouth of a canal that lead from the Donau out to the Black Sea.

Now for the first time they experienced the difficulties of paddling in rough seas, strong currents and winds this area brings at the end of summer. After 3300 km and ten different countries, they had no more than a week of paddling to their final destination of Istanbul, but the weather and sea conditions made each day they attempted to paddle south along the coast treacherous and difficult. With the start date for their second large adventure to walk across India looming over them, Marcus and Jonathan took the wise decision to store their kayaks on the coast to return next year, to continue perhaps even further beyond Istanbul.

Let´s go!

ENDURO

Hammerbach
Archive Prijon

NEW The adventure awaits you!
Explore the world in your new ENDURO 450.

The ENDURO 450 is an Allroundkayak, made for lakes, smaller and bigger rivers with moving and flowing waters and whitewater up to class 2.
While this allrounder mainly focuses on touring, it is however - thanks to its dimensions and the heavy rocker - very maneuverable, turns easily and reacts really fast. The ENDURO 450 isn't nervous but fast and tracks well for short to longer distance paddling on calmer waters. Therefore you're able to paddle easy torrents.

James Venimore

ENDURO **450** NEW

Made in Germany

The ergonomically optimized new TOUR-seat-system with backrest and comfortable 3D-thigh-braces provides a lot of comfort and footing, for longer distances and whitewater. Equipped with two waterproof bulkheads, a deckbox and luggage straps on the deck, as well as a steering mounting, you can immediately start the journey from the river to the coast.

TOURYAK

Sweden
James Venimore

Lake Simssee
Archive Prijon

TOURYAK **500**

Made in Germany

Large, spacious and safe. The modern lower boat with the sloped lateral surfaces offers a high level of initial and secondary stability, whilst running easily. The spacious cockpit with our new 3D-thigh braces allows even larger paddlers to maintain a comfortable seating position over longer periods of time. Large storage compartments and ample equipment.

Colors				

TOURYAK **470 LV**

Made in Germany

The smaller brother of the TOURYAK 500 is the optimum touring kayak for smaller and lighter paddlers. Deck height, width and volume have been adapted to fit the needs of smaller paddlers. A perfectly formed lower boat provides good tracking as well as a high level of agility via the edges.

ALBOREA **GRP / CA***

Made in Italy

Made for smaller adults looking for a boat which is easy to load and transport, but still runs like a big touring kayak. The ALBOREA weighs only 15.5 kg in carbon/aramide at a length of 422 cm. Therefore loading on the car roof as well as the transport to the water is very easy.

LAGUNA **GRP / CA***

Made in Italy

Good tracking on open waters, agile on smaller rivers! The keel is not as pronounced as on the longer touring kayaks, which makes the LAGUNA more agile. The weight of the carbon boat is approx. 18.5 kg. Therefore the handling of this lightweight kayak is very simple, loading on and off the car roof is no longer a problem.

GRP / CA*
Available in GRP (Glass Fibre Laminate) and CA (Carbon/Aramide).

Detailed information on our **Info-Centre on page 51 ...**

DAYLINER
SERIES

The local Hammerbach
Archive Prijon

Compact measurements, light weight as well as a good price-performance-ratio are characteristics of the DAYLINER Series, which by now has acquired a large fan base. Kayaks of the DAYLINER Series are equipped with two watertight separations and a comfortable seating system.

The simple deck equipment saves weight and enables us to offer you a favorable price. Pronounced edges on the lower boat provide a good tracking, the large base of the seat provides a high level of initial stability and agility.

Available in GRP (Glass Fibre Laminate) and CA (Carbon/Aramide).

Detailed information on our **Info-Centre on page 51 ...**

DAYLINER **LIGHT** GRP / CA*

Made in Italy

Compact, stable and lightweight allrounder. The cockpit has been extended to almost 100 cm to facilitate entry and exit, especially for less mobile paddlers. The light weight makes the handling of the DAYLINER LIGHT easier, especially when loading or during transport.

DAYLINER **S**

Made in Germany

A short, light, single tourer for tours on lakes and rivers. Smaller, lighter paddlers will instantly feel comfortable in this kayak. Made for beginners, looking for an uncomplicated paddling enjoyment.

DAYLINER **L**

Made in Germany

The L version was designed for larger paddlers. Ideal for beginners looking for uncomplicated paddling fun. Equipped with basic features like watertight storage spaces.

DOUBLE SEATERS

Lake Starnberg
Michael Neumann

Franconian Lake District
Manuel Arnu

EXCURSION EVO

Made in Germany

The ideal two-seater for your tour on rivers and lakes. Due to the broad knickspant and lots of rocker the boat glides easily around narrow bends. A lot of storage space and a very high degree of safety due to its high overall volume. Our HTP material demonstrates its superiority by providing the EXCURSION EVO with a very stiff boat hull. This boat will go through thick and thin with you.

POSEIDON

Made in Germany

A two-seater touring-kayak for open waters and coastal tours. The bow and stern of the POSEIDON possess pronounced keel lines, which ensure better tracking and a pleasant travelling speed. Of course the POSEIDON comes with a comfortable seat-system including our new 3D-thigh braces, suitable for longer distances.

PIAVE GRP / CA*

Made in Italy

The PIAVE weighs only 22 respectively 24 kg and is therefore one of the lightest double-seaters on the market. This makes him the first choice for paddlers looking for a lightweight and easy to handle boat, easy to load on a higher car roof. The PIAVE offers a high directional stability as well as agility and flip-stability.

YUKON KII SPORT GRP / CA*

Made in Italy

A perfect kayak for long tours across open waters. The elegant YUKON K2 glides easily through the water and brings you safely to your destination. Large, watertight storage compartments offer ample space for your equipment. With a weight of 25 and 29 kg respectively, it's one of the lightest boats of its class.

YUKON KII RELAX GRP / CA*

Open version of the K2 Sport. It's identic in length, width and lower boat to the K2 Sport. Thanks to the big open cockpit it's a perfect touring kayak for inland waters with only light swell.

Sweden
James Venimore

MARLIN LV Carbon Injection

NEW 2016: Even lighter - only 14,9 kg!
By using even more carbon and increasing the size of the sandwich we reduced the weight of the MARLIN LV to 14,9 kg. To offer you one of the lightest, fastest and most beautiful full-equipped touring kayaks on the market!

CARBON INJECTION

During the complex vacuum-injection process, carbon, aramide and glass fibre components are sandwiched together with reinforced foams while high-quality epoxy resin is injected, resulting in a very light and at the same time stiff and mechanically resistant boat hull.

The result is a fully-equipped, fast kayak with a sensational low weight!
The MARLIN LV is also available in standard polyester-wet laminate as GRP.
Weight approx. 20 kg.

	MARLIN LV	MARLIN PriLite
Material	**GRP / CI**	**PRILITE**
Length	**507 cm**	**530 cm**
Width	**57 cm**	**58 cm**
Weight	**14,9 / 20 kg**	**23 kg**
Volume	**335 l**	**375 l**
Capacity	**115 kg**	**140 kg**
Cockpit	**3 (88 cm)**	**3 (88 cm)**
Art.No. GRP	20 512	20 140
Art.No. CA	20 514	
Colors		

The version „Carbon Injection“ includes CARBON-FLEX pedals with a centric carbon-rail, carbon hatch-covers and a precious and visible carbon layer on the bottom.

Detailed information on our **Info-Centre on page 51 ...**

James Venimore

MARLIN LV GRP / CI*

JUST 14,9 kg

Made in Germany

A sensational light kayak for lightweight and moderate paddlers. The MARLIN LV impresses with elegance and velocity. Relaxed coasting, a high agility and easy turnings by edging and specific strokes. The very comfortable tour seat system is made for longer distances.

GRP / CA*
Available in GRP (Glass Fibre Laminate) and CA (Carbon/Aramide).

MARLIN PriLite

Kayak Pick

Made in Germany

Its elegant, stretched lines make it an ideal boat for travelling. Safe forward gliding, fast changes in direction using the edges of the boat, everything can be done in a safe and precise manner. Flat angles on the lateral areas make the boat very manageable and provide an optimum of stability.

SHINY!
Our MARLINs in the colors green and orange are especially eye-catching due to their metallic effect.

FAST SINGLE KAYAKS

From Sweden to the Black Sea
Marcus Aspsjö & Jonathan Ljungqvist

For lakes, the coast and the sea. The kayaks are slim and long, which provides them with a high base speed and good tracking qualities. Ideal for sporty and ambitious paddlers and faster tours.

MILLENIUM **EVO** NEW

Detailed information on our **Info-Centre on page 51 ...**

MILLENIUM **EVO** NEU GRP / CA*

Made in Italy

A facelift of the popular MILLENIUM with a new modern design of the deck, including lighter PE-hatches and a slightly lifted cockpit. This beautiful kayak is a combination of a fast seakayak and an agile single kayak for rivers and lakes. The long, slim, form provides a high level of speed, while the pronounced knickspant on the lower boat offers a high agility. The MILLENIUM also works on rivers and lakes.

PROTEUS GRP / CA*

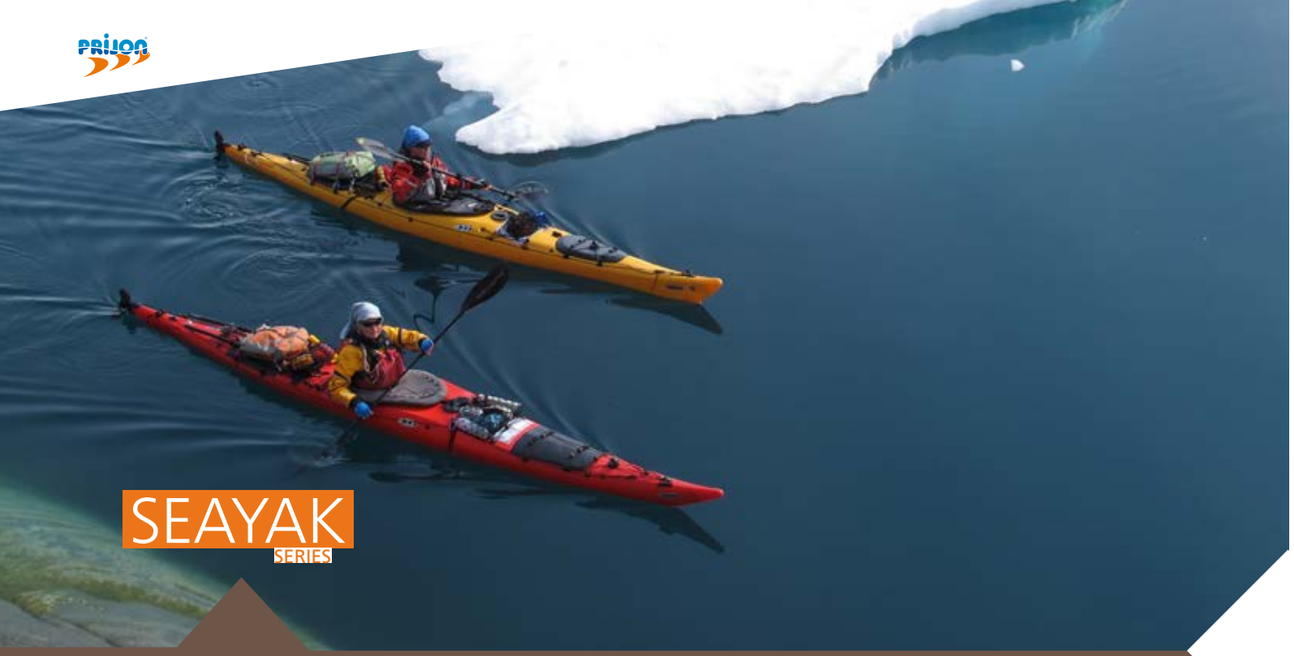
Made in Italy

The PROTEUS is made for long and fast tours on open waters and along the coast. Pronounced keel-sections in the front and rear result in a long water line and consequently in a high cruising speed. A safe position in the water and a balanced relation between directional stability and maneuverability makes you feel superior anytime.

BARRACUDA **RS** GRP / CA*

Made in Italy

The BARRACUDA RS is a very fast kayak for sporty and ambitious paddlers. Made for racing marathons and long-distance competitions, trainings in the evening and longer tours with a small amount of luggage. Due to its slim form, minimum rocker combined with a pronounced V-spant, the BARRACUDA RS is the roadster among the Prijon kayaks. Take your time to get used to the BARRACUDA RS and you will have a great time!



SEAYAK
SERIES

Greenland
Archive Prijon

The names SEAYAK and KODIAK have been a synonym for fast, attractive kayaks with safe and manageable riding qualities for many years. Three different SEAYAK-shapes and the KODIAK offer the perfect fitting boat for every paddler for larger rivers, lakes or tours along the coast. SEAYAK and KODIAK are also available as lighter ACTIVE-versions with reduced equipment at a favorable price.

ACTIVE
Lightweight and economical version of the SEAYAK due to reduced equipment.

Detailed information on our **Info-Centre on page 51 ...**

SEAYAK **520 HV**

Made in Germany

Sporty and safe SeaTourer for medium to higher weight. It works best on long tours across open waters with a lot of luggage. The sloped lateral surface of the lower boat provides it with a reliable secondary stability. Swimming flat on the water the 520 HV possesses a high tracking quality, while it's easy to maneuver along bends via its lateral edges. Equipped with our new 3D-thigh braces.

SEAYAK **500 LV**

Made in Germany

Sporty and fast kayak for smaller and lighter paddlers. Main characteristics are the slim and sporty shape, low overall volume as well as a cockpit with an optimum seating position for smaller paddlers. Marked lines on the lower boat, derived from our knickspant, provide the 500 LV with good tracking qualities as well as good agility on the lateral edges. Equipped with our new 3D-thigh braces.

SEAYAK **CLASSIC**

Made in Germany

The SEAYAK Classic is an agile allrounder for rivers and open waters. For medium weight and sized paddlers the SEAYAK offers comfortable space conditions and enough storage for extensive tours. Equipped with our new 3D-thigh braces.

KODIAK

Made in Germany

The KODIAK is fast, safe and a great load carrier. It offers an unique amount of storage space for this boating class as well as a very spacious cockpit which is especially interesting for larger paddlers. The high volume is also a further safety aspect when touring on the sea. The Kodiak is equipped with our new 3D-thigh braces. That means lower weight and increased comfort!

KIDS KAYAKS

Franconian Lake District
Manuel Arnu

SEAYAK JUNIOR **PRO**

Made in Germany

The SEAYAK Junior has been perfectly adapted to suit the needs of children and teenagers. Thanks to its balanced riding qualities, it can keep up well with longer and larger boats, even over longer distances. Equipped with a watertight storage in the rear, a deckleash and steering mounting.

FLIPPER

JUST 9 kg

Made in Germany

Instant paddling fun for your kids with the FLIPPER. Thanks to PriLite the Flipper has an unrivalled low weight, which enables children to playfully move the boat. With its child-friendly seating position, the small paddlers feel safe in the boat anytime.

Kayaks for all budgets! Choose your individual configuration according to your wishes and requirements. Everything's possible - from a light and economical basic model to the fully equipped touring kayak. The CustomLine-models distinguish themselves through their appealing look as well as neutral, safe and uncomplicated riding qualities.

Three configurations are available:

BASIC:
Sawtooth-footrest, Tour-seat, CL-backrest with foam padding and luggage spider.
RENTAL:
Sawtooth-footrest, Tour-seat, CL-backrest with foam padding and luggage spider,
PE-floating device in front, floating-device made of foam in the rear.
FULL EQUIPMENT:
Slide-footrest with steering fixtures, Tour-seat with Tour-padding, CL-backrest with padding and cover,
bulkhead with cover in the rear, CL-thigh braces, luggage spider in front,
pull-in widget for inflatable floating device in front (floating device optional).

Optional at BASIC and RENT:
Comfort-Set, including Seat Cushion,
Backrest-cover and thigh-pads for self-assembly:

Detailed information on our **Info-Centre on page 51 ...**

CustomLine **CL 470 Relax** NEW

Made in Germany

NEW 2016! Paddling-fun for the whole family! The CL 470 RELAX is an open double-seater for families and rental stations. Its main characteristics are a very high stability and easy handling. The combination of a length of 470cm and a moderate rocker enables the CL-RELAX for the sea, lakes and streams. An optional child's seat can be added fast and will transform the CL-RELAX into an ideal family-kayak. Our tour-seat with the new, high CustomLine-backrest guarantees a comfortable sitting position. The front seat can be fixed in a centric position and is therefore usable as single-paddler-position.

CustomLine **CL 370**

Made in Germany

The pronounced keel lines provide good tracking, the large base gives the CL 370 a high level of stability and agility. The large cockpit makes it easier to get in and out of the boat. Our tour seat with the new high CustomLine back rest guarantees a comfortable sitting position.

CustomLine **CL 430** NEW

Made in Germany

NEW 2016! Paddling fun for beginners – Ideal for the rental! The CL 430 is a very stable beginner kayak with an easy handling. The combination of a length of 430cm and a moderate rocker enables the CL 430 for the sea, lakes and streams. The big cockpit offers an easy entry and exit. Our tour-seat with the new, high CustomLine-backrest guarantees a comfortable sitting position.

CustomLine **CL 490**

Made in Germany

Double-seater for beginners with an excellent directional stability, safety and agility. The large cockpits ensure an easy entry and exit. Our tour-seat in combination with the high backrest guarantees a comfortable sitting position.

CURVE SERIES

Undiscovered Kayak-Land
Nord-Scandinavia on the edge of Europe

North-Norway
Sebastian Gründler

Canyons dug in lonely Fjells, mysterious whitewater in absolute solitude – the stuff kayak dreams are made of. A team consisting of Sebastian Gründler and Ulrich Kittelberger erased one of the last blank areas on the map of European rivers.

Even by using satellite data, the research about the rivers located between polar circle and North Cape took nearly one year, as there was nearly no information available on the internet. The parameters: Far-away from the few roads, reachable only by a day's march, with an average length of whitewater of minimum 40 k in unknown terrain – a special and challenging physical challenge.

The idea: only a minimum of luggage, to keep the handling in heavy whitewater, and walking and paddling during the midnight sun as long as possible. Especially light kayaking material was the most important premise for these speed-tours. Plus an agile and fast kayak for whitewater with steep and unclear headwaters. Still offering enough volume for a sleeping bag and a tent. Therefore we chose the CURVE - a good decision! Even after dragging the boats for more than 120k over endless Fjells they didn't let us down! But most of all we were impressed by the agility of the boats, even when carrying all the luggage.

The kayaks gave us great pleasure – no ifs, no buts!

PRO-Fitting

The PRO-fitting provides an excellent contact to the boat. This leads to more agility and a far better control over the kayak while demanding athletic use. The PRO-fitting is solid and functional, the sitting position is very comfortable, footbrace and seat can be adjusted quickly.

The bottom rail in combination with sturdy and lightweight foam domes in the front and back provides the already very durable HTP-shell with even more rigidity.

NEW in 2016 is the longer, ergonomically optimized PRO-seat which is interlocking connected with the floor rail, the foam pads attached on the side on the cockpit rim and the revised 3D-thigh braces with enlarged padding. The result is a more comfortable and compact sitting position at a lower weight! The seat padding can individually be adjusted with the supplied foam pads with regard to width and height. The lightweight back-belt offers a very good hold and is easy to adjust, thanks to the new mounting. PRO-fitted kayaks are equipped with an aluminum footbrace as a standard.

CURVE **3.0 PRO**

Made in Germany

The CURVE 3.0 is a fast and agile whitewater kayak with excellent boof and buoyancy qualities. Pronounced edges on the lower boat provide good tracking and precise riding qualities. Steep or heavy, narrow or open whitewater, the CURVE 3.0 is great fun on all terrains!

CURVE 3.0 ACTIVE Light and economical version of the CURVE 3.0, due to its reduced equipment. Details at page 31.

CURVE **2.5 PRO**

Made in Germany

The perfect whitewater kayak for smaller and lighter paddlers! Thanks to its dynamics and agility you will immediately feel comfortable in the CURVE 2.5. Its light weight and the reduced measurements simplify its handling. The cockpit rim, which has been widened towards the back, improves the mobility of the paddler. The broad bent-up tip provides safety, its pronounced edges high initial stability and maximum agility.

CURVE 2.5 ACTIVE Light and economical version of the CURVE 2.5, due to its reduced equipment. Details at page 31.

CALI

CALI PRO NEW

Made in Germany

The Cali is as comfortable on steep creeks as it is in big volume. Nimble, predictable, stable and easy to roll, it combines a perfect mix of advanced design and beginner friendly features. This versatile kayak allows paddlers to progress without ever holding them back. Balanced volume distribution, fast speed, crisp control, easy boofs and bomber structural integrity are combined to make this the ideal craft for paddlers pushing their limits, and those just starting out. Unparalleled durability and volume that lends itself to multi-day expeditions make the Cali the boat of choice for challenging expeditions or an unfailing companion for backyard runs - year after year. Its hull made of our indestructible HTP guarantees an all-time longevity.

NEW 2016: Ergonomically optimized cushion on the footbrace for a better foot rest and damping in the CALI PRO.

PURE & FORTE

PURE S / M

Made in Germany

PURE S and M are creekers with balanced handling and high safety reserves. Rapid changes in direction, safe and controlled emergence and rapid acceleration allow the paddler to focus fully on the creek. They offer a lot of driving pleasure, high safety and extreme durability thanks to the HTP-shell. The ACTIVE-equipment, there is a version of the Price values PURE with solid, simplified equipment. The ACTIVE-version at a favorable price offers a solid and simplified equipment.

FORTE ACTIVE

Made in Germany

A lightweight and sporty river runner for light and medium-weight paddlers. A lot of rocker and a bent-up rear result in an enormous agility. Available as light and economical version with reduced equipment.

A new program for whitewater kayaks:

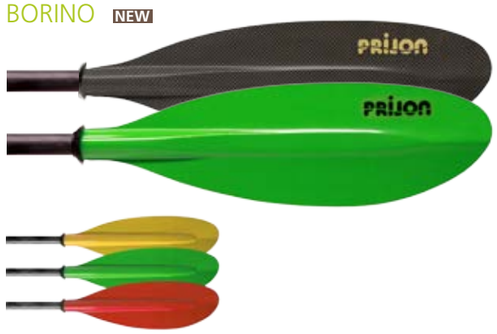
ACTIVE – simplified outfitting at a favorable price. For paddlers looking for a light kayak but not needing a full equipment.

ACTIVE includes: HTP-hull, PRO-seat with seat-padding and padded backrest, 3D-thigh braces, aluminum shock absorber plate, grips in the front and back as well as the safety bars in front of the cockpit and behind it.

Available for these models: CURVE 2.5, CURVE 3.0, PURE M, PURE S, FORTE.

PADDLES

BORINO NEW



FROM 760g

Our new Prijon paddle is a true allrounder! Smaller paddlers and women will like the low weight and the easy guidance in the water as much as ambitious paddlers on longer tours. Thanks to its low weight and the slim blades both an energy-saving technique and an endurance orientated paddling with a higher frequence is possible.

Blade size: 46 x 16 cm — Lenght option A & PaddLock

CARBON approx.760g Art.No. 339 000
CARBON PaddLock approx.840g Art.No. 339 000 TS
CARBON ERGO approx.760g Art.No. 339 000 E

GLAS approx.790g Art.No. 338 000
GLAS PaddLock approx.870g Art.No. 338 000 TS

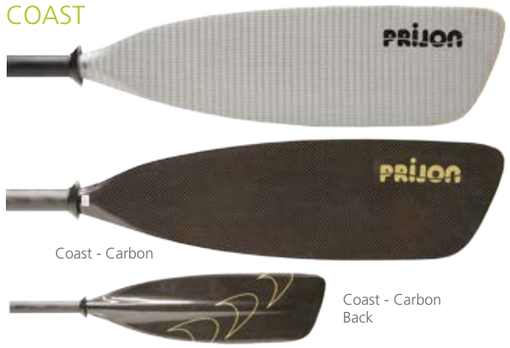
High-quality, hand-laminated touring paddles with a smooth inner surface and pronounced grooves. These paddles provide strong propulsion, without drifting upwards or downwards. The DYNEL edge is characterized by its very high fibre density, absorbing blows very well when hitting the ground. Due to our new hard foam technology the paddle blades are very stiff.

LENGTH OPTIONS

Available Lengths in cm:

A	215, 220, 225, 230, 240
B	180, 185, 190, 195, 200, 205, 210
PaddLock	210, 220, 230

COAST



Coast - Carbon

Coast - Carbon Back

The paddle blades of the COAST have a very slim design, making it work very well during strong winds on open waters. It doesn't provide the wind with a target.

Blade size: 54 x 16 cm — Lenght option A & PaddLock

DYNEL-Edge

STREAM

Stream - Glass

Stream - Glass Back

The STREAM consists of high-quality carbon or glass fibres, pressed into a mold under high pressure and at a high temperature. The profile in the paddle blade permits a construction without a middle core. The blades are very stiff and don't flutter. Its stability can be compared to our high-quality white water blades. Due to its shape which is a bit flatter, the STREAM is also suited for sea kayaking. It glides easily through the water and is saves energy to the paddler.

Blade size: 49 x 17,5 cm — Lenght option A & PaddLock

CARBON approx.880g Art.No. 318 000

ERGOSHAFT

Some of our Whitewater- and Touringpaddles are also availabe with a wrist-gentle, neutral and lightweight Ergo-shaft.

PADDLOCK

Offers a broad range for the paddler: from an exact fixation of the degree value to an infinitely variable fixation of the length in a range of 10cm. For the using by various paddlers, in various boats or wind conditions. Thanks to the quick release system the paddle is ready for action by only a few handholds. Paddles with PaddLock-system have a small pack size, ideal for transporting.

BORA

The nicely shaped BORA paddle is an economical version of our profiled touring paddles. The blade consists of a dry impact resistance polyamide 6 with UV stabilizers, enriched with approx. 35% glass fibre, providing it with a high level of rigidity and very high impact resistance.

BORA approx.970g Art.No. 355 000
BORA PaddLock approx.1050g Art.No. 355 000 TS — Lenght option A

PASSAT

With a blade size reduced by approximately 25% and a smaller shaft diameter, compared to the BORA paddle, this paddle is especially suited for teenagers and small adults. The low weight and the small effort needed, make it possible to paddle also longer distances without tiring quickly. Our Passat paddles are unfortunately not available with PaddLock-system.

PASSAT approx.870g Art.No. 356 000 — Lenght option B

RIM ARDECHE

Economically-priced beginner paddle. Blade made of impact-resistant RIM material. Aluminum shaft.

RIM ARDECHE approx.1100g Art.No. 314 000
AUFPrice TEILUNG M. DRUCKFEDER Art.No. 31 010 — Lenght option A

RIM KOMBINATION

An allround paddle, which can be used both for white water and touring. Blade made of impact-resistant RIM material, shaft made of anodised aluminium.

RIM KOMBINATION approx.1130g Art.No. 311 000
AUFPrice TEILUNG M. DRUCKFEDER Art.No. 31 010 — Lenght option B

RIM INDIAN CANOE PADDLE

Tough canoeing and rafting paddle. Blade made of impact-resistant RIM material. Aluminum shaft.

Lengths: 140 btois 160 cm in 5cm-Steps. 165cm with not fixed grip.

RIM INDIAN approx.890g Art.No. 352 000

RIM CHIEMSEE SUP-PADDLE

Stable and low maintenance due to the well-proven RIM technology. Pleasant handling thanks to great buoyancy qualities. A paddle for SUP beginners, as well as for rental and schools, excellent price-performance ratio!

Length 220 cm, uncut, detachable grip.

RIM CHIEMSEE approx.990g Art.No. 351 000

GODZILLA

Godzilla - Carbon
Back

Godzilla - Glas
Back

Attractive whitewater paddle, especially strong, with foam core and peripheral DYNEL edge. The paddle blade is very stiff due to our new foam core technology. Thereby you can apply high pressure on the paddle. The felt forward propulsion is 20% higher. The built-in DYNEL edge is very impact-resistant and plays along with the bending movements of the blade. The higher volume of the paddle blade provides above-average flotation, similar to a wooden paddle. The GODZILLA is available with a straight glass shaft or with an ERGO shaft, made of carbon.

GODZILLA CARBON

GODZILLA CARBON approx.1020g Art.No. 335 000

WW	190	195	197,5	200	202,5

TOW LINE MULTI

Rescue equipment for tourers and sea kayakers. Packed tightly, it is only a bit higher than the hip belt so that it fits well on the back between the life vest and the spraydeck and doesn't hinder you from paddling. Packed loosely (bag folded out) additional pieces of equipment can be stored together with the rope. Equipment: rope length 10 meters with integrated impact-softener. Kayaking carabiner with floater. Hip belt with quick fastener, reflective zone.

Art.No. 80 178

PADDLEFLOAT

The paddle becomes a stabilizing outrigger, which facilitates re-entering the kayak. An essential companion when venturing into open waters. Our float can additionally be used as a flat packsack which can be stored under the deck net. For safety reasons you should carry a bilge pump in addition to the float.

Art.No. 80 330

BILGE PUMP

Bilge pump to drain the kayak. Combined with the paddle float an essential for paddling in the sea.

Art.No. 90 123

PADDLE LEASH

When the paddle gets lost, open waters can become very dangerous. Our sturdy paddle leash consisting of a 25 mm tubular strap with integrated rubber cord keeps your paddle safe to the boat. It is attached to the paddle with a belt loop with Velcro closure.

Art.No. 90 180

STEERING KI, KII and JUNIOR PRO

Fully folding steering for PRIJON kayaks. With a profiled, flow-optimized steering blade, made of fibre-reinforced plastics. Almost all PRIJON kayaks can optionally be equipped with a foot steering. Tracking and agility can be positively influenced by use of the steering equipment.

STEERING KI Art.No. 90 524
STEERING KII Art.No. 90 517
STEERING JUNIOR PRO Art.No. 90 523

MOTO MOUNTING F. TORQEEDO UL 403

Mounting kit for the high tech motor by Torqueedo, suitable for PRIJON touring kayaks. The motor is attached to the stern instead of the steering. The battery can be attached in the storage hatch or on deck. Steering is done via the foot pedals.

Includes:
Mounting kit for the motor with retraction device, steering lines.

Please refer to your specialized kayak dealer regarding price and technical details of the Ultralight 403 motor.

Art.No. 90 528

HELMET SURF

Fullcut Shortcut

Our classic and very popular helmet with a good price-performance-ratio. ABS-plastic shell with high level of rigidity. Shock-absorbent Poly-propylene hardfoam interior with soft contact pads, which distributes the shock energy from outside and thereby reduces it. With the Spin-Disk-System, these helmets are continuously adjustable from 51-63 cm head girth.
Colors Fullcut: red. yellow and black
Colors Shortcut: red and yellow

FULLCUT Art.No. 50 110
SHORTCUT Art.No. 50 160

LIFE JACKET MACH II

Front zip for easy putting on and off. Enclosing strap system to fit the body shape in the best possible way. Hip belt, rescue belt with panic release, two pockets, reflective zones. Cowtail with paddle carabiner.

Sizes: M/L and XL/XXL

Art.No. 80 080

KAYAKING KNIFE

Single hand knife with rust-proof 7cm blade. Rounded tip to prevent injuries. Loop for safety line and rust-proof clip for attachment.

Art.No. 80 510

NOSE CLIP

With stainless steel spring clip, rubber pads and cord.

Art.No. 90 185

PADDLE CARABINER

Carabiner for rescuing and securing of paddlers, boats and equipment. The large opening fits round the paddle shaft.

Art.No. 80 410

ROPE ROLL PULLEY

For building a hoist.

Art.No. 80 180

THROW BAG TEAM

Extra large opening for quick filling. Form stable kernmantle rope with a rupture load of approx. 1200kg. The TENAX-fastener can be handled well, even with cold fingers. Rescue carabiner on the throw bag line as a standard feature. Due to its flat basic shape, the TEAM throwbag with its optional hip belt can be attached flat to the body and does not interfere with paddling.

THROWBAG Art.No. 80 322
QUICK RELEASE HIP BELT Art.No. 80 310

RESCUE SYSTEM LONGLIFE

Versatile rescue equipment for the attachment on the life-jacket. Including a Paddle-Carabiner.

Art.No. 80 190

THROW BAG ALLROUND

With a 20 meter line, belt loops at the sides and perimeter strap with a lock for fast attaching to the equipment when climbing or to secure it in the kayak.

Art.No. 80 325

KID LIFE JACKET

Front zipper, chest and tummy belt for perfect fit, crotch strap to prevent slipping out, unconsciousness-safe collar, signal whistle, large reflectors.

Size 1: 15-20 kg
Size 2: 20-30 kg
Size 3: 25-40 kg

Art.No. 80 040

ANGLER LIFE JACKET

Inconspicuous simple life vest for fishermen or paddlers. 3 large pockets, zip at the front, 4 straps at the sides to adjust size. Shoulder strap for length adjustment.

Sizes: M/L - XL/XXL

Art.No. 80 030

FLOATER LIFE JACKET

Light touring vest with zip. Equipped with reflectors for better visibility as well as a crotch-strap to prevent the jacket from riding up.

Sizes: S, M/L XL/XXL

Art.No. 80 070

AIR PACK

Water-tight pack bag combined with separate floater. With the AirPack the paddler can always carry dry clothes without having to go without the safety of a floater. Material: sturdy Nylon.
Fits for float bags of the sizes 4 and 5.

Art.No. 60 409

FLOTATION

Float bags prevent a kayak from filling with water after emergency exits and provide extra stiffness for the boat. We are offering single floaters in different sizes, shown in this table:

Canoe	Bouyancy tubes 3,2m (Pair, blue)	

SPRAYDECKS

Verzasca
Archive Prijon

We offer spraydecks and cockpit covers in three different materials:

NEOPRENE
These spraydecks are made for continuous operation on rivers, lakes and the sea. Their most important characteristic is that they stick on the cockpit, even in choppy waters and when doing an Eskimo-roll.

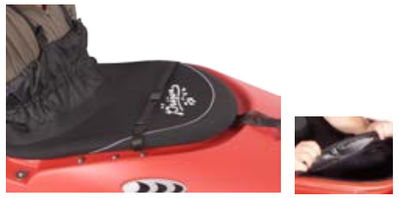
FLEX
The advantages of the stretchable FLEX-Nylon material are its low weight and small pack size. These spraydecks have very good hold on the boat. Their mechanic resilience is lower than the one from Neoprene.

NYLON black / yellow or red
Basic spraydecks for touring on domestic waterways, protecting against spray and rain. They're a bit more favorably priced, but still hold well on the boat.

PRO SAFE WHITEWATER

Functional white water spray deck with pre-formed plate. The ProSafe is easy to attach and due to its Latex lamination on its inside it remains firmly on the cockpit. Knee belt and grip sling as standard feature. A first class deck at a reasonable price.
Waist size: 72 cm, 79 cm, 86 cm, 93 cm.

Art.No. 73 900



TOURING SPEZIAL

High quality touring and sea kayak spraydeck. Very stretchable plate with abrasion-resistant area at the front, knee belt and grip sling. Latex coat on the inside, offers excellent hold, even on wet cockpit rims. Chimney made of breathable 3-layer-laminate for the most comfortable fit. Width of hem can be individually adjusted. Shoulder straps can be taken off.

84-88cm (Cockpit 1, 3) Art.No. 73 750
92-96cm (Cockpit 2, 3) Art.No. 73 700
95-102cm (Cockpit : 4, 5) Art.No. 73 760

FLEX

Lightweight, high-quality spraydecks made of stretchy Nylon material with waterproof lamination. The big advantage of these decks is their perfect fit due to their neoprene-like stretchability, as well as their very light weight and small pack size.

81-88cm (Cockpit 1, 3) Art.No. 74 500
88-94cm (Cockpit 2, 3, 4) Art.No. 74 550
95-102cm (Cockpit 4, 5, 9) Art.No. 74 600

TOURING BASIC

Made for tourers, easy white water and kayak rentals. Due to its extremely stretchable plate, the deck fits cockpits from 86 to 96 cm. Chimney made of breathable 3-layer laminate for best possible comfort. The very stretchable neoprene rim at the top provides safe hold on the body.

Deck 86-92cm (Cockpit 2, 3): Chimney S/M Art.No. 73 801
Deck 86-92cm (Cockpit 2, 3): Chimney L/XL Art.No. 73 802
Deck 90-96cm (Cockpit 2, 4): Chimney S/M Art.No. 73 803
Deck 90-96cm (Cockpit 2, 4): Chimney L/XL Art.No. 73 804

NYLON RED

Basic spraydeck for touring made of soft and light Nylon material. With a pocket at the front of the chimney, welded seams and removable shoulder straps.

Sizes and Art.No. see Table

NYLON BLACK-YELLOW

Basic spraydeck for touring with a robust deck. Soft chimney, pocket at the front of the chimney, compression proving bow, welded seams and removable shoulder straps.

Sizes and Art.No. see Table

NYLON UNIVERSAL

Nylon spraydeck at a favorable price with mesh pocket at the front, grip sling and shoulder straps. Cockpit size and hem adjustable with elastic band.

Cockpit to 85cm Art.No. 72 600
Cockpit to 94cm Art.No. 72 700

HATCH COVER NEOPRENE

To cover the cockpit during storing or transporting your kayak on the car roof, to keep dirt and vermins out. Safe hold on the cockpit without flapping. Reduces airstream noises and saves fuel.

Offers you the possibility to transport your gear and to keep the inside of your boat dry while traveling.

Cockpit to 85cm Art.No. 78 210
Cockpit to 93cm Art.No. 78 200

HATCH COVER NYLON

Available in different hatch sizes.
Made of PVC-laminateed material.

Sizes and Art.No. see Table

FLEX HATCH COVER

Stretches similar to neoprene, can be stored even easier, thanks to its low weight and the small packing size.

SUPERLIGHT NEOPRENE

Superlight Neoprene is made for competitive sport, summer paddling and for wearing under paddling jackets. Upper lamination 100% Superstretch Nylon.

The thermo-reflective lamination is pleasant to the skin, offers perfect ability to move and protects the body from cooling down.

PULLOVER SUPERLIGHT

Long-sleeved top.

S - XXL Art.No. 41 550

T-SHIRT SUPERLIGHT

Short-sleeved top.

S - XXL Art.No. 41 350

SHORTY SUPERLIGHT

Short Neoprene pant, cut to fit when sitting.

S - XXL Art.No. 41 450

CAP SUPERLIGHT

Very thin cap.
Keeps warm and fits under the helmet.

Art.No. 40 700

PADDLING PAWS

The paws are attached to the paddle shaft with Velcro. Hands are protected from wind and cold. One size fits all, made of 4 mm - neoprene.

Art.No. 40 840

GLOVES

Gloves made of neoprene with non-slip texture on the inside and across the finger tips. Pre-bent fingers. Velcro strap at the wrist.

S - XXL Art.No. 40 830

NEOPRENE SOCKS

No longer cold feet when paddling thanks to our neoprene socks. Neoprene keeps even wet feet pleasantly warm. Laminated on both sides.

Size 36/37 - 46/47 Art.No. 40 600

NEOPRENE SHOE HIGH

High-cut paddling bootie made of elastic neoprene with vulcanized sole. Perfect in narrow boats, as the shoes do not take up a lot of space.

Size 35/36 - 45/46 Art.No. 42 300

NEOPRENE SHOE LOWv

Low-cut paddling bootie made of elastic neoprene with vulcanized sole. Perfect in narrow boats, as the shoes do not take up a lot of space.

Size 35/36 - 45/46 Art.No. 42 400

KID LIFE JACKET

Front zipper, chest and tummy belt for perfect fit, crotch strap to prevent slipping out, unconsciousness-safe collar, signal whistle, large reflectors.

Size 1: 15-20 kg
Size 2: 20-30 kg
Size 3: 25-40 kg

Art.No. 80 040

JUNIOR NEOPRENE SHIRT

Long-sleeved shirt made of thin Neoprene. Very stretchy and pleasant to wear.

Size 1 - 3 Art.No. 41 360

JUNIOR PADDLING JACKET

Breathable jacket with comfortable fit. Adjustable collar and cuffs with Velcro fastener.

Two-layered material:
Upper material 100 % Nylon,
Membrane 100 % Polyurethane.

Size 1 - 3 Art.No. 46 760

HOODIE UNIVERSAL

The hood can be used independently from the jacket. Diverse adjustment possibilities. The face is protected best from the elements.

Art.No. 46 980

JUNIOR NEOPRENE SHORT

Short Neoprene pants cut to fit when sitting. 3-mm-Neoprene, laminated on both sides.

Size 1 - 3 Art.No. 43 210

With the help of our table, you can easily determine the right size for your child.

SIZE	1	2	3
Height	132 - 142 cm	142 - 152 cm	152 - 162 cm
Chest	66 - 71 cm	71 - 76 cm	76 - 81 cm
Waist	53 - 58 cm	58 - 63 cm	63 - 68 cm
Hip	71 - 76 cm	76 - 81 cm	81 - 86 cm

JUNIOR LONG JOHN

Neoprene suit laminated on both sides. The variable Velcro fastener at the shoulders and the flexible material make the suit grow with your child.

Size 1 - 3 Art.No. 43 200

BARRELS

Screw-top closures and rubber seal ensure that these storage barrels are watertight, sturdy and food safe. The smallest barrel fits behind your back belt.

3,6 Litres Art.No. 90 305
6,4 Litres Art.No. 90 310
15,4 Litres Art.No. 90 320
26,0 Litres Art.No. 90 330

HATCH BAG

A combination of a watertight clothes bag and hatch cover. Roll-top closure with triple safety buckles. Universal size for cockpits starting at 86cm. Straps, which are fastened around the boat, for strong hold. Handles facilitate the handling of the boat with attached bag. Shoulder strap detachable. Material: Nylon, taped seams.

Art.No. 78 010

MOBILE PHONE BAG

Floatable and waterproof Nylon bag with valve for easy inflation, to ensure your mobilephone stays safe while paddling. Complete with safety loop and belt clip.

Available in 2 Sizes:
Size M: for mobilephones at a size of approx. 7x13cm
Size XL: for smartphones at a size of approx.14x9 cm

M Art.No. 44 030
XL Art.No. 44 029

MAP SLEEVE

Watertight, see-through, with four plastic carabiners.

DIN A4 Art.No. 44 021
DIN A3 Art.No. 44 026

DECK BAG SEAYAK

Watertight deck bag, accessible from the boat. Bilge pump holder, mesh bag with zipper, signal whistle and straps for attaching to the boat.

Art.No. 44 025

DECK BAG WATERTIGHT

Deck bag, made of sturdy Nylon material with welded seams, can be mounted in front of or behind the cockpit rim. Roll-top closure with safety belt, handle and loops for attachment.

Art.No. 44 020

DRY-BAGS

Waterproof dry bag, made of sturdy Nylon material. With handle and removable shoulder strap. The roll-top closure is very soft and flexible.

TRANSPORT

On the way to the put-in
Archive Prijon

THE PRIJON TRANSPORT PROGRAMM

In our program you find a wide range of tools, helping you transporting and handling your kayak. It starts with the loading on the car roof. You need a base support, officially approved for your car. These base supports are available at car dealers.
We offer you kayak-specific accessories which you will find on the following pages.
All our products of the transport-program are “Made in Germany”.

BOAT CART

For transporting your kayak from the car to the water and back and in case of walking passages during tours, we offer you a large assortment of boat carts. The choice for the right cart depends on the type of the kayak and the requirements to the pack size. Smaller and lighter carts are easier to store in the kayak, larger carts with bigger wheels roll better in rough terrains and don’t cave in that easily.

Picture of the Day Tourer L.

Day Tourer S

Day Tourer L

DAY TOURER S & L

The Day Tourer S boat cart is equipped with a strong elastic round-rubber and can be attached to the kayak within seconds. Perfect for a short transport from the car to the water or a short portage!

Very small pack size. The base frame of the Day Tourer L is widened a little bit, to enable it for a more centric position below the kayak.

Furthermore the Day Tourer L is equipped with larger wheels for a smooth rolling. The easy function principle is the same at both sizes.

Day Tourer S
Material: Stainless Steel
Capacity: approx. 90 kg
Wheel size: 19,5 x 4,5 cm
Weight: approx. 1,8 kg

Art.No. 90 191

Day Tourer L
Material: Stainless Steel
Capacity: approx. 100 kg
Wheel size: 27 x 6 cm
Weight: approx. 2,0 kg

Art.No. 90 187

STEEL S & L

The frames of the STEEL-series are made of stainless steel and therefore completely corrosion-free. Thanks to the new stick-technique with springs made of stainless steel the construction forgoes loose parts. The PU-foam-wheels reduce the overall weight and cannot lose air.

Small pack size in dismantled state!

Steel S
Material: Stainless Steel
Capacity: approx. 90 kg
Wheel size: 19,5 x 4,5 cm
Weight: approx. 1,8 kg

Art.No. 90 192

Steel L
Material: Stainless Steel
Capacity: approx. 100 kg
Wheel size: 27 x 6 cm
Weight: approx. 2,5 kg

Art.No. 90 197

CROSSOVER

Thanks to its round support it fits for all hulls, from a sea kayak to a canoe. Fully dismountable, with big wheels. Fits in small storage spaces, inkl. lashing straps.

Material: Aluminium
Capacity: approx. 120 kg
Weight: approx. 3,0 kg

Art.No. 90 186

CROSSOVER LIGHT

Very light, broad wheels keep the weight of the boat cart just below 2 kg. The wheels are foamed, so there is no tiresome pumping or loss of air.

Material: Aluminium
Capacity: approx. 120 kg
Weight: approx. 2,0 kg

Art.No. 90 190

BOAT CART WITH SUPPORT

Freestanding boat cart with big wheels and a lot of ground clearance. Frame made of stainless steel, including lashing straps. This cart is constructed without a central axis and can therefore easily be thread into the storage hatch.

Material: Stainless Steel
Capacity: approx. 110 kg
Weight: approx. 2,6 kg

Art.No. 90 193

TRANSPORT

Vertical support bars enable you to transport several boats on your roof rack, as the boats are transported upright side by side. The foldable version can remain on the roof of the car, even at low vertical clearances, e.g. at the garage door.

J-Bars protect your kayak best during transporting, as the support reaches around the boat hull. The canoe- ¼-bars are made for open canoes and big double seaters. To facilitate loading heavy boats on the roof we offer you our highly resilient load assist. With this tool a single person is able to load heavy boats on the car roof with little effort.

Depending on the distance between the bars and the length of the kayak we recommend an additional tied-down fixation of bow and stern. Please consider the legal requirements regarding roof load, permitted lengths and labeling when transporting your kayak on the car roof. All PRIJON-roof racks are „MADE IN GERMANY".

ROOF RACKS FOR SQUARE BARS

Roof racks for mounting on standard square bars, made of high quality steel, corrosion-free galvanized.

¼ BAR (1)

Galvanized steel, for the transport of canoes or large kayaks. Set of 4.

Art.No. 90 221

VERTICAL SUPPORT BAR (2)

Galvanized steel. Ideal solution, if you want to transport several boats on your car roof. Belts can be strapped down on both sides. Set of 2.

Art.No. 90 219

J-BAR (3)

Galvanized steel. Limits the risk of material damage to your kayak. Set of 2.

Art.No. 90 210

J-BAR WITH PADDLE HOLDER (4)

Galvanized steel. For 2 paddles per boat. Paddles don't require an extra strap. Set of 2.

Art.No. 90 215

LOAD ASSIST

Loading your boat made easy with the PRIJON load assist! Fits every roof rack - easy handling even for smaller persons. A common problem…the kayak is heavy and the height of the cars increases. Many paddlers are cannot get into enjoying kayaking due to the sometimes very energy-consuming handling. The PRIJON load assist makes it possible for one person to load a kayak without any extra help. The load strap prevents the kayak from slipping backwards. The bow is placed on the extension, the stern lifted on the rack. Push the extension in, strap down the boat, done!

The most important advantages: You never have to carry the whole weight of the boat. There is no more difficult balancing to do. Even smaller persons can now easily load the boat onto the car roof.

Art.No. 90 225

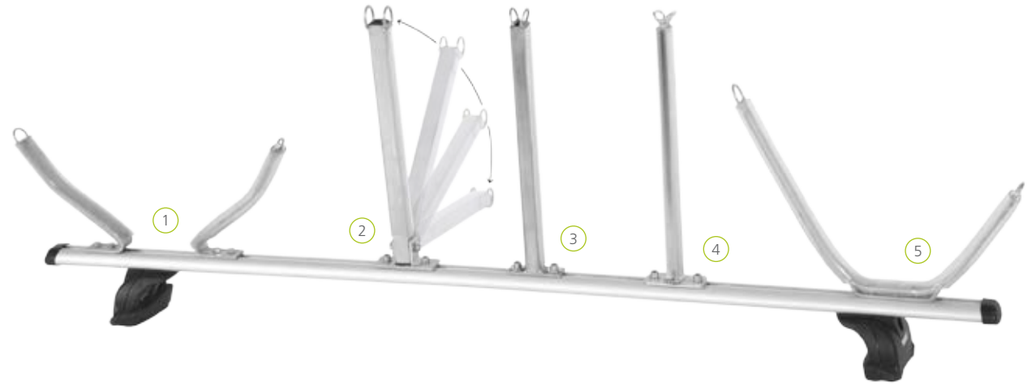
ADAPTER FOR LOAD ASSIST

With this adapter the load assist can easily be attached on roof rack tubes with grooves.

Art.No. 90 226

ROOF RACKS FOR BARS WITH GROOVE

Support elements for the attachment on tubes with groove, like e.g. Thule Alu, Zölzer or various profiles by car manufacturers. Mainly made of stainless steel.



¼ BAR (1)

Stainless steel. For the transport of canoes or large kayaks. Set of 4.

Art.No. 90 217

VERTICAL SUPPORT (2) FOLDABLE

Stainless steel. Very sturdy. The support bars can be folded down when not used, the vehicle fits into the garage without having to take down the roof rack. Set of 2.

Art.No. 90 235

VERTICAL SUPPORT (3) STAINLESS STEEL

Ideal solution for a space-saving transport of several boats. Belts can be strapped down on both sides. Set of 2.

Art.No. 90 218

VERTICAL SUPPORT (4)

Galvanized steel. Economical version for mounting on tubes with groove. Set of 2.

Art.No. 90 223

J-BAR (5)

Very sturdy J-Bar for the safe transport of your kayak, made of stainless steel. Set of 2.

Art.No. 90 216

FOAM PADDING

Foam padding for square tubes. Prevents the kayak from slipping. Set of 2.

Art.No. 90 236

TIE DOWN STRAPS

Made of Polypropylene with self-clamping metal buckle. Certified according to EN 121 95-2.

3,5 m Art.No. 90 240
5,0 m Art.No. 90 250

PYTHON MASTERLOCK

Made in USA. Very sturdy anti-theft device for kayaks, bikes and other sporting equipment. The steel cable can be tightened after locking.

Set lock and steel cable 1,8 m
Art.No. 90 171
Set lock and steel cable 4,5 m
Art.No. 90 172
Steel cable 9,1 m
Art.No. 90 176

ADAPTER SMALL

Adapter for attaching our square roof rack equipment on tubes with groove. Set of 2.

Art.No. 90 226

VACO SEAT CUSHION

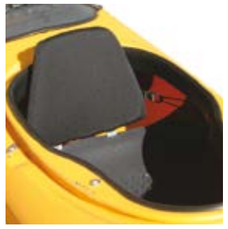
This seat cushion for the PRIJON tour seat is a great help for paddlers who have problems sitting in the boat for a longer time. The cushion is filled with plastic beads and can be adjusted with a vacuum pump, the cushion then fits perfectly, because it takes the individual seat shape of the paddler.
Get in – pump – feel comfortable!

Art.No. 90 169

SEAT- AND BACKREST

The included lumbar support can be adjusted via the backrest. Seat made of sturdy Nylon material with included foam padding, back rest cushioned with preformed foam wedge. Suitable for many different types of seat.

Art.No. 90 161



COMFORT BACKREST

For PRIJON touring kayaks. The backrest is approx. 10 cm higher than the standard backrests and therefore very comfortable. Also very easy to install.

Art.No. 90 134

ABRASION PROTECTOR

For the stern of Cruiser 430/CL 430 in case of frequent ground contact, for example in the rental.

Art.No. 90 031

REPAIR STICKS HTP

For repairs of minor damages on HTP hulls. Available in different colours.

Art.No. 90 080

REPAIR SET

Kit Polyester:
Repair material for GRP kayaks.
Set Epoxy:
For repairs of minor damages on Carbon-Aramide kayaks and boats made of PriLite.

Polyester Art.No. 00 012
Epoxy Art.No. 00 011

SEAT OR BACKREST COVER

To upgrade your Prijon touring seat.

Seat cover Art.No. 100 000 42
Backrest cover Art.No. 100 000 41

SEAT CUSHION JUNIOR

Suitable for the SEAYAK Junior. Comes with attachment material.

Art.No. 90 184

THIGH PADS ACTIVE

Preformed thigh pads with screws. To equip boats without thigh pads. Set with spacers and screws.

Art.No. 90 173

XERAPOL POLISH PASTE

For surface care and removal of minor scratches on PriLite kayaks.

Art.No. 90 092

GLUE FOR PROTECTING CAPS

For the mounting of protecting caps. Also for stern mountings.

Art.No. 90 096

MARINE GOOP

For gluing of foam separations and other sealing jobs on HTP kayaks.

Art.No. 00 017

CAMP FIRE MULTI PURPOSE SEAT

Padded Kayak and camp fire seat, made of Nylon with adjustable back rest. Upper material 100 % Nylon.

Art.No. 90 163

CANOE SEAT COMFORT

Padded canoe seat for additional installation, incl. straps for attachment.
Upper material 100 % Nylon.

Art.No. 90 162

TRANSPORT AND STORAGE

Prijon HTP – boat hulls are very sturdy and hard-wearing. The material used has already received its permanent protection against UV rays. Normal ground impact occurring when touring cannot harm the hull. Transport with standard roof racks is easy. Slight deformations caused by the cargo straps will go back to the normal shape within minutes after unloading the kayak. When transporting longer boats over longer distances, we recommend you to additionally secure the ends of the boat with straps.

If the boat is permanently stored outside, the boat hull should be covered, in order to prevent premature fading of the colour. Temperatures of -40° C to +60° are no problem at all. Even under such extreme conditions, HTP will keep its flexibility and sturdiness. It is not necessary to treat it with varnishes, wax or other polishing substances. These would become apparent on the surface and cause unattractive discolourations. For cleaning, just use warm water with a dash of washing-up liquid.

HTP - HOCHLEISTUNGS-THERMOPLAST

For the production of its world-famous HTP-kayaks, PRIJON is using a special PE, called HTP. This material can only be used in blow-moulding and not in roto-moulding, as used by other producers of kayaks. The molecule chains of HTP are approximately 10 times longer than those of rotated PE. This makes the boat hulls stiffer, lighter and less susceptible to abrasion. HTP-kayaks have clear advantages regarding form stability, abrasion and boat weight, compared to kayaks made of rotated PE. HTP is very environmentally friendly. When it is recycled, there are no poisonous gases or residues; it is ground water neutral and free of heavy metals. Care: HTP-boat shells are very sturdy and already possess a permanent protection against UV-rays. Therefore they need no treatment with varnishes, wax or other care materials.

- (+) **Extremely high mechanical durability**
- (+) **Not sensitive to ground impact**
- (+) **Stiff and form-stable during paddle tours in the Arctic and the Tropics**
- (-) **Comparably high weight**

PRILITE

For PriLite boats, the ABS-combination plates, sealed with UV-resistant perspex, are pulled into the hot moulds, which have a temperature of approximately 80 degrees, in a computerized process, using heat and vacuum. The upper and lower parts of the boat are inseparably joined together by a double-sided U-profile. This profile additionally strengthens the sides of the kayak against impact. The mounting of deck mountings and interior fittings are thoroughly done by hand, as on all Prijon boats. Advantages: PriLite boats are approx. 20% lighter than comparable kayaks made of HTP. At the same time there is a clear advantage regarding stability compared to GFK or Carbon/Aramide.

Repairs/Care: Superficial scratches can be polished off with a special paste, available in specialized shops. Larger repairs are made with Epoxi. The inside of the boat should not be permanently exposed to sun (store upside down!).

- (+) **Lighter than HTP**
- (+) **More sturdy than GRP/Carbon Aramide**
- (-) **More susceptible to mechanical wear and tear than HTP**

LAMINATED KAYAKS

Laminated kayaks are made by hand in the traditional way. They are more sensitive to contact with the ground compared to boats made of HTP or PriLite, and should therefore be predominantly used in free-flowing waters. PRIJON is offering the two material varieties of GPR and Carbon/Aramide.

Carbon-Aramide

These boats mainly consist of carbon and Aramide fibres, combining the excellent qualities of carbon, which is very hard and gives the boat its stiffness with the qualities of Aramide, which is very shock-proof and provides the necessary impact resistance of the kayak. The biggest advantage of this construction method is clearly the incredibly low weight (up to 10kg lighter than HTP-boats).

- (+) **The lightest boat, 25% less weight than a HTP-kayak**
- (+) **Elegant shape**
- (-) **More susceptible to mechanical wear and tear than HTP and PriLite**

GRP

The fibre mats of our GRP-kayaks mainly consist of glass fibres, which are very stiff, but still reasonably priced. Kayaks made of GRP are comparable to the PriLite boats with regard to their weight.

- (+) **20% reduction of weight compared to a comparable HTP-kayak**
- (+) **Elegant shape**
- (+) **Simple handling outside the water**
- (-) **More susceptible to mechanical wear and tear than HTP and PriLite**
